

QUENZZY J. NAVELGAS

Blk 20 Lot 12, San Antonio De Padua II, City of Dasmariñas, Cavite
0916-683-7582 • quenzzynavelgas123@gmail.com

PROFESSIONAL SUMMARY

Results-driven and freelance professional with hands-on experience in AI-assisted content creation, automation testing, and frontend web development. Proven ability to manage high-volume, multi-project workloads independently while maintaining quality and meeting strict deadlines. Adept at leveraging AI tools, modern development frameworks, and structured workflows to deliver consistent, client-aligned outputs across diverse technical and creative roles.

EDUCATION

Emilio Aguinaldo College
Bachelor of Science in Computer Science

2023 – 2026
Dasmariñas, Cavite

PROFESSIONAL EXPERIENCE

YTA Business (Remote)
Freelance AI Scriptwriter

February 2026 – June 2026

- Created AI-assisted long-form YouTube scripts across 30+ channels spanning history, lifestyle, automotive, documentary, survival, and true crime niches.
- Leveraged AI tools (Claude, ChatGPT, Poppy) with structured prompt engineering to produce engaging, retention-focused scripts tailored to each channel’s unique voice and audience.
- Managed script production pipeline using Trello and Google Sheets for task tracking, channel prioritization, and progress monitoring across simultaneous projects.
- Communicated and coordinated with cross-functional teams—including video editors and thumbnail artists—via Discord.
- Adapted writing style and tone across 30+ distinct channel personalities while maintaining brand consistency.
- Submitted biweekly End-of-Day (EOD) reports summarizing script completions, blockers, and channel status updates.

JogaLiga — Startup (Remote)
Freelance Virtual Assistant / Web Developer

January 2026 – February 2026

- Developed reusable UI components using Astro and Tailwind CSS following structured technical documentation.
- Implemented mobile-first, high-contrast UI designs aligned with client requirements and evolving design preferences.
- Utilized Git and GitHub for version control, including branching and pull request workflows.
- Applied AI-assisted tools for prompting, debugging, and code generation to accelerate development.
- Conducted audience research on Brazilian culture, trends, and social media behavior to support marketing strategy.
- Identified potential beta testers and maintained organized project documentation.
- Delivered regular progress updates and responded to client feedback professionally.

QNE Software Philippines, Inc.
Quality Assurance Intern (Automation Testing)

June 2025 – July 2025

- Assisted in creating and executing automated test cases for website modules, ensuring functionality, usability, and compliance with business requirements.
- Utilized Playwright and JavaScript to streamline regression and functional testing processes.
- Performed bug reporting and tracking using Notion, facilitating timely communication with the QA team for defect resolution.
- Collaborated with the QA team to validate fixes, conduct re-testing, and perform exploratory testing.
- Prepared test data and maintained test environments for consistent and reliable testing outcomes.
- Documented test results and provided detailed feedback to the QA lead for stakeholder reporting.
- Gained practical experience in SDLC, software testing methodologies, and Agile team collaboration.

PROJECTS

WoofWoof: ML-Based Dog Disease Prediction System

2025 – 2026

Lead Developer & ML Developer

Emilio Aguinaldo College — Thesis Project

- Designed and developed a full-stack, web-based clinical screening tool that predicts 14 common dog diseases using a Voting Classifier ensemble (KNN, SVC, and Gaussian Naïve Bayes), achieving a cross-validated accuracy of 94% ($p < 0.001$) — the highest among 10 evaluated algorithms.
- Engineered the end-to-end ML pipeline: feature engineering across 10 input categories (breed, age, weight, diet, environment, vaccination status, symptoms, and more), one-hot and binary indicator encoding, StandardScaler normalization, and soft-voting aggregation for final disease prediction.
- Conducted a structured two-phase algorithm experimentation process, benchmarking 10 models (Decision Tree, Logistic Regression, SVC, Random Forest, XGBoost, Gradient Boosting, and others) using k-fold cross-validation ($k = 5-7$) to justify the Voting Classifier as the winning model.
- Applied hyperparameter tuning via Grid Search, Random Search, and Bayesian Optimization (Optuna) to optimize ensemble performance; serialized the final model using Joblib for production deployment.
- Built and deployed the system as a Django (Python) web application with a Django REST Framework API backend, Django-templated HTML/CSS/JS frontend, and PostgreSQL database; integrated Groq AI for supplementary disease information.
- Implemented security features including rate limiting (django-ratelimit), brute-force protection (django-axes), CAPTCHA verification, and Google OAuth 2.0 (django-allauth).
- Collaborated with licensed veterinarians to validate the clinical accuracy of encoded symptom-disease relationships in the training dataset.

Pesotrack: Budgeting & Expense Tracking Web App

2026

Frontend & Backend Developer

Personal Project

- Built end-to-end with Next.js 15 App Router, Prisma ORM, and PostgreSQL (Neon), with NextAuth v5 for Google OAuth and credential-based authentication.
- Designed a global multi-currency system with live exchange rates, supporting 11 currencies with real-time conversion across all charts, KPIs, transactions, budgets, and reports.
- Implemented a responsive bento-grid dashboard with animated KPI cards, cash flow bar charts, categorical spending pie charts, and a recent activity feed.
- Integrated Groq AI to generate personalized financial insights and spending pattern summaries from the user's transaction history.
- Built a dynamic theming system with light/dark/system mode and 6 selectable color themes, all persisted across sessions.
- Developed full CRUD for accounts, transactions, budgets, savings goals, and categories — with CSV/Excel import, JSON backup/restore, and CSV export.

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, Bootstrap, Tailwind CSS, PHP, Astro, Django, TypeScript, Next.js
- **Machine Learning:** Scikit-learn, Ensemble Methods, Soft Voting, Feature Engineering, Cross-Validation, Hyperparameter Tuning, Python, Pandas, NumPy
- **Testing & QA:** Playwright, JavaScript, Automation Testing, Automation Scripting, Bug Tracking
- **IT Support & Systems:** Computer Hardware, Microsoft Windows, Linux, OS Administration, Troubleshooting, CLI, Software Configuration
- **Networking & Security:** Wireless Networking, Network Troubleshooting, DNS, Network Security, IT Security Fundamentals
- **Version Control:** Git, GitHub
- **AI-Assisted Development:** Claude, ChatGPT, DeepSeek, BlackBox, Cursor, Poppy
- **Data & Analytics:** Power BI, Looker Studio, Tableau
- **Collaboration Tools:** Microsoft Office, Google Workspace, Trello, Notion, Discord
- **Game Development:** GDevelop

SOFT SKILLS

Strong communication and interpersonal skills • Detail-oriented and highly organized • Effective time management and problem-solving • Proactive in seeking clarification and feedback • Adaptable to shifting priorities • Fast learner with new tools and roles • Collaborative team player • Leadership and team management

CERTIFICATIONS

- Google AI Essentials – Coursera (2025)
- Google IT Support Professional Certificate – Coursera (2025)

AWARDS & LEADERSHIP

- Excellence in Team Stewardship Award
- Polaris Award for Strategic Guidance
- Vice President – Internal, School of Computer Studies and Informatics (2025 – 2026)
- Vice President – External, Junior Philippine Computer Society (2024 – 2026)
- Secretary, School of Engineering and Technology (2025)
- Computer Science Representative, School of Engineering and Technology (2023 – 2025)
- Event Member, Computer Science Seminar: CTRL+F The Future — Future-Proof Guide to Web Development in collaboration with Kblink.ph (2024)
- Event Member, Central Student Council Board - Emilio Aguinaldo College Cavite Leadership Training & Seminar (2024)
- Event Member, Central Student Council Board - Emilio Aguinaldo College Cavite Leadership Training & Seminar (2026)

PERSONAL INFORMATION

Age:	21 years old
Gender:	Female
Civil Status:	Single
Citizenship:	Filipino
Height:	5'5"
Weight:	50 kg
Languages:	English, Filipino
